Summary
Backend engineer with 8 years building payment and data platforms in Go, Python and PostgreSQL. Led the migration of a ledger service to event sourcing, cutting reconciliation errors by 92%. Comfortable owning systems end to end, from API design to on-call.

Experience
Senior Software Engineer, Ledgerly - San Francisco, CA
Mar 2021 - Present
- Led a team of 4 engineers migrating the core ledger service to an event-sourced design on PostgreSQL and Kafka, reducing reconciliation errors by 92%.
- Designed an idempotent payouts API handling 3.2 million requests per day at 99.98% availability.
- Cut p99 latency of the balance endpoint from 840 ms to 120 ms by adding read replicas and a Redis cache.
- Mentored 3 junior engineers; two were promoted within 18 months.

Software Engineer, Brightpath Analytics - Austin, TX
Jun 2018 - Feb 2021
- Built a Python and Airflow pipeline ingesting 40 GB of clickstream data per day into Snowflake.
- Rewrote the reporting API in Go, lowering infrastructure cost by $18,000 per year.
- Introduced contract tests between 6 services, reducing integration incidents by half.

Junior Developer, Cobalt Labs - Austin, TX
Jul 2016 - May 2018
- Maintained Django services for a logistics client and added automated test coverage from 35% to 80%.

Skills
Go, Python, PostgreSQL, Kafka, Redis, AWS, Kubernetes, Terraform, gRPC, Event sourcing, Distributed systems

Education
B.S. Computer Science, University of Texas at Austin, 2012 - 2016

Certifications
AWS Certified Solutions Architect - Associate (2022)
